Test competition for Shotgun events for shooters with impairments

Dear all,

IPC Shooting would like to inform you that, in accordance with the Memorandum of Understanding Addendum 1 (Shotgun discipline) signed between IPC and the International Shooting Sport Federation (ISSF), the Federazione Italiana Tiro a Volo (FITAV) will hold a test competition for Shotgun events for shooters with impairments 27-29 August 2013 in Todi, Italy.

Under the Memorandum of Understanding the IPC and ISSF recognise FITAV as the organisation that will coordinate the research project into the possible development of a Shotgun discipline for athletes with impairments.

As part of their research project FITAV is authorised to conduct test competitions for Shotgun events for athletes with impairments, in order to gather research and data to further their development project.

Any NPCs interested in supporting FITAV in their research project and in sending athletes to participate in the test competition should contact FITAV directly (l.minelli@fitav.it) as this competition is not within the ownership or jurisdiction of the IPC.

Kind regards

Sarah Bond
